

March 7th, 2024

Mr. Chairman,  
Mr. Secretary,

FISA is helping to build the future of aero-and astrophilately and supports its member associations! Through the questionnaire below, we would like to find out more about the services offered by each of FISA's member aero- and astrophilatelic associations.

At our next congress on May 29 in Versailles, we plan to present initiatives to create international aero- and astrophilatelic communities, without penalizing the associations' financial situation. We will be proposing a project to set up an IDP (International Digital Passport) enabling a member's membership of his or her national association to be extended to include access to the digital services (publications, websites, etc.) of other FISA member associations, for a minimal additional annual fee.

<b>Members</b>		
	How many members in total does your association have in 2024?	
	Including how many international members (= not residing in the country of your association)?	
	Does your association offer an "all-digital" membership option for your members?	
<b>Site web</b>		
	Does your society have a website?	
	Address? <a href="https://www">https://www</a> .	
	If not, are you planning to set up a website within the next 2 years?	
	If your association already has a website, does it feature members-only content (digitized old newsletters, documentation, etc.)?	
<b>Newsletter</b>		
	How many newsletters are distributed each year?	
	Are these newsletters distributed digitally to your members?	
<b>Sales between members of your association</b>		
	Do you organize aero- / astrophilatelic sales between members?	
	If so, how many per year?	
<b>Zoom videoconference (or equivalent)</b>		
	Do you organize videoconferences between members?	
	If so, how many per year?	
	Are these videoconferences recorded and posted online?	

We would like to receive the completed questionnaire back before March 25, 2024. Thank you in advance.

Stefan Bruylants  
FISA General Secretary

Dominique Petit  
Vice-President
